Preparations for 2019/2020 - Looking Ahead

In planning for the next school year, staff and administrative teams at École J.S. McCormick and École Lacombe Upper Elementary work cooperatively to assign students to classroom settings where their educational, emotional and social needs can be most effectively met. This involves a team approach; the current homeroom teacher, administration, and counsellors make recommendations for placement. We also look at the 'big picture' in order to create classrooms which are balanced with boys and girls, have students with different academic abilities, and have the potential for positive social interaction. Parent input is valued, especially when placing students with particular needs, and we acknowledge the help you can give us.

Should you wish to provide information which will help us in placing your child in a classroom next year, please submit a signed letter (from a parent or guardian) to the school office no later than **Thursday, June 6, 2019**. If you are asking for specific teachers, we would appreciate knowing your rationale and request that you list your **first and second choice**. Please understand that it may not be possible to honor every request.

Fortunately, most students easily adapt to a new classroom setting and are often pleasantly surprised by the new friends they make as well as the new experiences that a teacher can offer. Thank you for understanding the complexities of creating classes, giving us the information you feel will help us, and showing confidence by allowing us to assign your child to a classroom.

School Council

École Lacombe Upper Elementary School Council will recognize all students, staff & ÉJHS student helpers at École Lacombe Upper Elementary School by providing a complimentary hot dog during the Track & Field Day on June 6th.

Thank you parents! Way to go students!

The students will.... describe the physical, emotional, and social changes that occur during puberty ie. menstruation, secondary sexual characteristics, changing identity and moods.

Grade Five

Students will...identify the basic components of the human reproductive system and describe the basic functions of the various components e.g. fertilization, conception.

Grade Six

Students will... examine and evaluate the risk factors associated with exposure to blood borne diseases - HIV, AIDS, hepatitis B/C; e.g. sharing needles, body piercing, tattooing, helping someone who is bleeding, being sexually active.

Students will... identify and describe the stages and factors that can affect human development from conception through birth.
